

News and Updates

Q1 2019

Making technical
recruiters happier every
day

• • Summary

AmazingHiring introduces AI sourcing and Data Enrichment capabilities. So let us see what's new in details!

AI sourcing

New Extension

Search Hints

The screenshot displays the AmazingHiring search interface. At the top, a search bar contains the query "(Java AND React) AND UK". Below the search bar, the results are filtered to show 10K total profiles, with 8K having contacts and 1K without. The interface includes a sidebar with navigation options like "Search", "Folders", and "More". The main content area lists search results for three candidates: Cevin May, Mathew Clark, and John Wilson. Each profile includes a profile picture, name, location, current role and company, and a list of previous employers. A vertical toolbar on the right side of the results list contains icons for contact methods: phone, email, chat, and a globe. A large orange arrow points from the right side of the screen towards the search results area.

AI SOURCING SOLUTION

- AI Sourcing - a new way of creating search queries

AI SOURCING **NEW** SEARCH FORM SAVED QUERIES HISTORY

Software engineering

DATA

ENRICHMENT

- Find candidate's social accounts using only their email on any website or platform.

Example 1: Facebook

All you need is to highlight the email and choose “search by email in AH” in the right click menu. Then the extension bar will show its profile.

The image shows a composite of two screenshots. On the left is a profile for Aaron Ramos, a Junior frontend developer at AmazingHiring, with contact information and skills listed. On the right is a Facebook post from AmazingHiring. A context menu is open over the email 'ar@gmail.com' in the post, with 'Search by email in AH' highlighted. A blue circle with the number '8' is in the bottom right corner.

Find profile by email on any website.

Search by email in AH

- Integrate any ATS with AmazingHiring using search by email

Example: Greenhouse ATS

Highlight the email, click “Search by email in AH” and get the results

The image shows a screenshot of the Greenhouse ATS interface. On the left, a candidate profile for Robert Ovsepan is displayed, including his name, title (Junior frontend developer), company (Right soft labs), location (Amsterdam, Netherlands), and email address (rob.hovsepyan@gmail.com). A search icon is visible next to the email address. On the right, a search results page for the job 'Senior Java Developer' is shown, listing Robert Ovsepan as a candidate. A context menu is open over the email address, showing options like 'Look Up "rob.hovsepyan@gmail.com"', 'Search Google for "rob.hovsepyan@gmail.com"', and 'Search by email in AH' (highlighted in blue).

- Add comments to the candidate's profile using our Extension

Leave a comment about a candidate through the Extension and then use it to search for them in the engine.

Choose a condition “comment” and type the comment you’ve left previously.

The image shows a composite of two screenshots from a job search application. The left screenshot is a modal window titled "Find profile by email on any website." It features a search bar at the top, a profile picture of Timur Mingaliev, his name, title "Principal software development engineer, Amazinghiring global", location "Redwood City, USA", and two email addresses: "t*****@gmail.com" and "t*****@mingaliev.com". Below the emails are social media icons for LinkedIn, Medium, GitHub, and Facebook. A "Skills" section shows "Python". At the bottom, there is a "Comments" section with a text input field containing "#software_engineer" and a "cancel" button.

The right screenshot shows a search bar at the top with the text "Search". Below it is a link for "Need Job Posting Tips". The main content area shows a profile picture of Timur Mingaliev, his name "ur Mingaliev", and his title "2nd ipal software engineer" and location "ood City, California". At the bottom, there are three buttons: "onnect", "Message", and "More..."

SEARCH

HINTS

- Highlight the source for every criteria in your search query, helping you to cross-reference information and create even more personalised emails to your candidates.
